

The Village of Tinley Park recently awarded a \$705,366 contract to H. Linden & Sons of Plano, IL to upgrade the existing storm sewer along Glenview Drive, Ravinia Drive and Pine Point Drive between Elm Lane and Riverside Drive with new 12- to 36-inch storm sewer under the pavement and in the parkway. This improvement is expected to improve drainage in that neighborhood during heavy rainfall by increasing the amount of rainfall the system can convey.

Because construction has progressed ahead of schedule on Glenview and Ravinia, work is scheduled to begin on Phase Two on Pinepoint Drive the week of Oct. 24 (weather permitting). All restoration work in the parkway (curb and gutter, sidewalk, pavement restoration and grass) that is disturbed will be completed by Dec. 1, 2016.

The Village asks residents' full understanding and cooperation during construction. Those who have problems can contact the Public Works Department at (708) 444-5500.
